To the office of Government Ethics –

KS Governmental Ethics Commission

This letter is to explain two mistakes made on our July campaign finance report. The first was an accidental omission. I paid for my filing fee out of my own personal funds rather than my campaign funds, and that should have been listed as an in-kind contribution. I did not file by petition – I simply paid the full fee at the Secretary of State's office.

The second issue in question was the double addition of the contribution from the McPherson County Democrats. This contribution was made right between the January filing period and the session, and so we accidentally counted it both then and then again during the July filing period. Because of that, the 250 dollar contribution was added twice. The form then shows 250.00 dollars too much in cash-on-hand, and needs to reflect a reduction of that amount across the board.

We apologize for these errors, and appreciate your understanding. The Don Svaty campaign makes every effort at accurately filing all campaign reports. If you have any questions, don't hesitate to call or email.

All best,

Don Svaty
