- Bank statements match reports up to October 25, 2018
- Typo on October 29, 2018 report
- Says that cash balance on Oct 252018 was $\$ 1,056.67$ when it was actually $\$ 1,086.67$, and indeed the items on the report add to the correct amount in the bank account. This is a typo of - $\$ 30$ (reporting that cash on hand is $\$ 30$ less than it actually is)

- Overall thoughts
- Reports have gotten significantly more accurate as time has gone on
- Many problems are due to the fact that previous treasurers were looking at Actblue contribution dates rather than when the money actually hit the bank
- For a period of time years ago, KYD did not have a treasurer, making quite a mess for the previous treasurer to fix
- Some of the errors cancel out, meaning that the report balance and actual balance are not actually that different right now
- Current difference is $\$ 59.06$
